

CODING CLUB RESOURCE HUB

Project Kickoff Meeting // Sprint 0

```
System.initialize(); // Setting the Foundation
```

Land Acknowledgment

We respectfully acknowledge that the Coding Club is located on the traditional, ancestral, and unceded territories of the Syilx Okanagan Nation

VISION & MISSION

Building a centralized platform for the CMPS community through collaborative software engineering.

THE PROJECT OBJECTIVES

FOR STUDENTS

- A high-performance repository for CS, Math, Physics, and Stats resources.
- Forums and discussions to encourage course specific support.
- Information on clubs & events, campus opportunities & advice, and professor research

FOR DEVELOPERS

- A real-world sandbox for software engineering.
- Contributors gain experience with full-stack technologies, Agile workflows, and peer-reviewed code in a professional setting.
- Resume booster and the opportunity to give back to the campus and leave behind a legacy!

ROLE CLARIFICATION

Engineers & UI/UX

Responsible for the UI/UX implementation and creating interactive resource viewers.

Architecting the API, managing database schemas, and implementing secure authentication for user-contributed content.

DevOps

Setting up CI/CD pipelines, performing code reviews, and maintaining the documentation for open-source contributors.

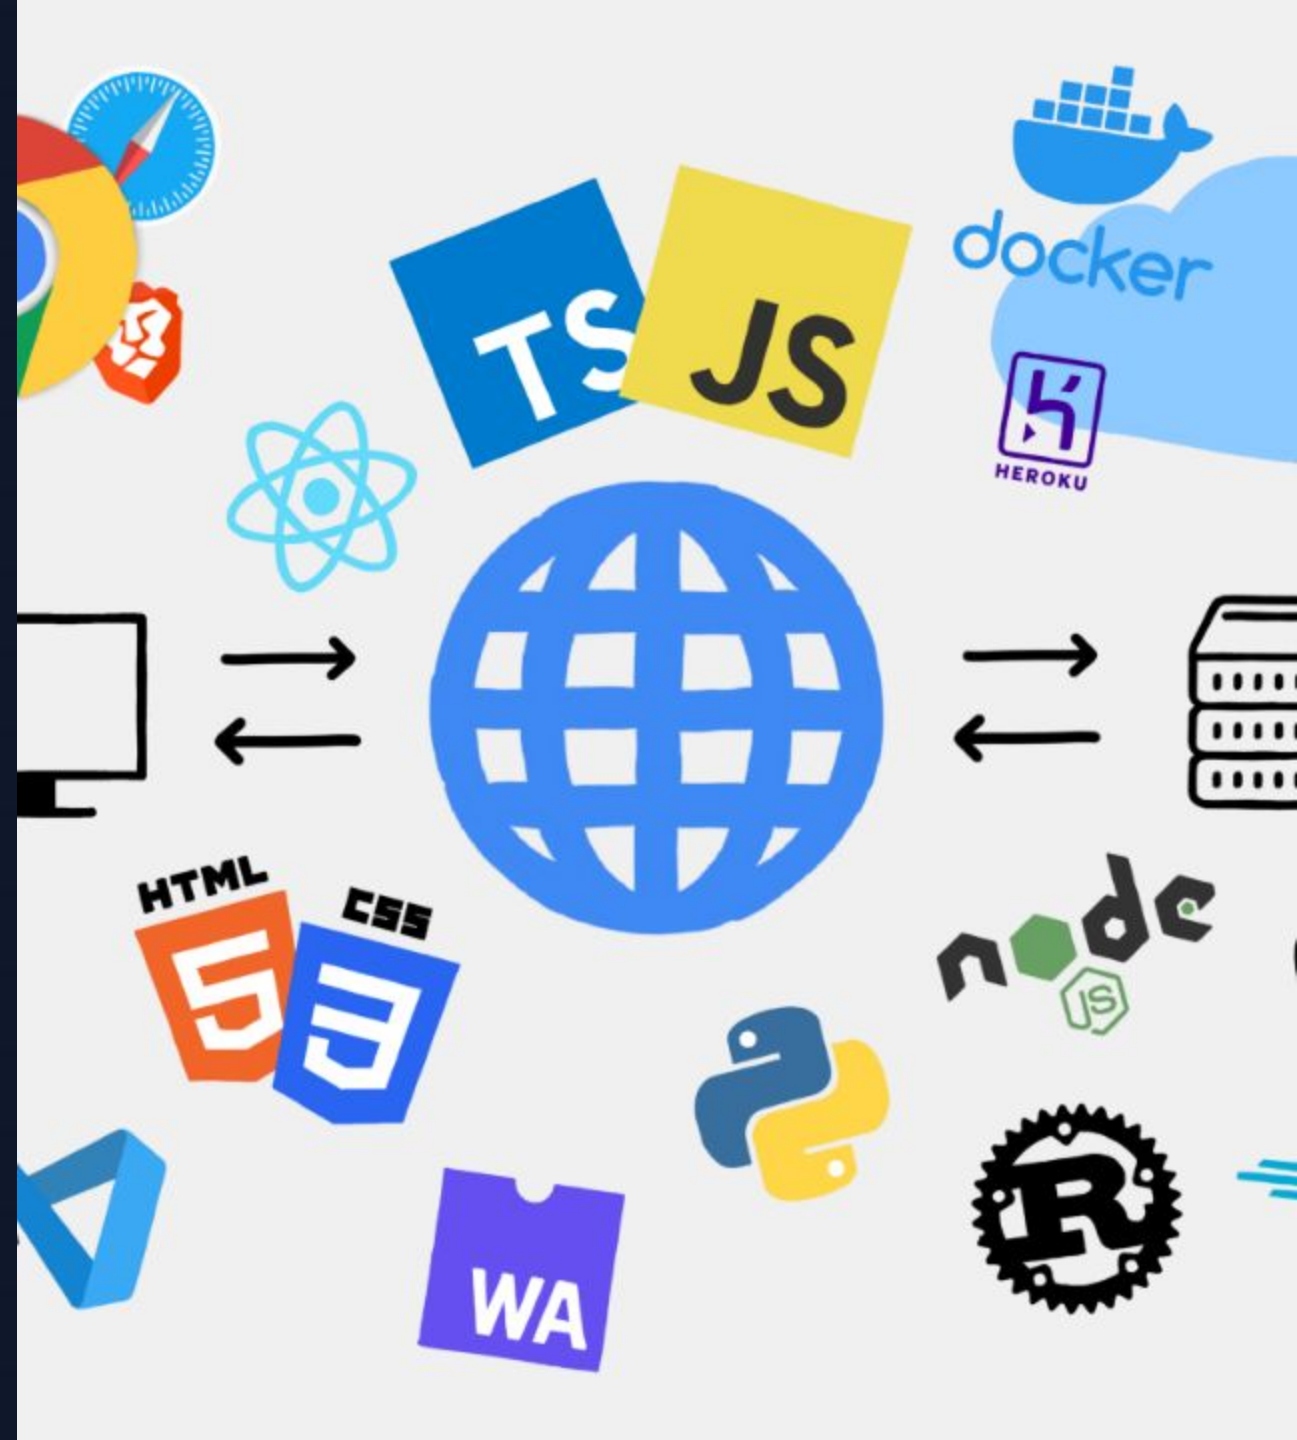

Human Resources

Managing collaboration across teams, moderating content, planning meetings, and keeping meeting notes.

OUR TECHNOLOGY STACK

-  **Vite** for performant, SEO-friendly rendering and routing.
-  **PostgreSQL / Prisma with Spring Boot** for structured academic data management.
-  **Tailwind CSS** for a rapid, responsive, and aesthetic UI kit.
-  **Spring security** for secure university SSO integration.

RULES & CONTRIBUTION GUIDELINES

-  **GitHub Flow:** No direct commits to 'main'. All features must go through a feature branch and a Pull Request.
-  **Code Review:** Every PR requires at least one approval from a maintainer before merge. Focus on readability and test coverage.
-  **Linting & Styling:** Currently it's not necessary to have strict code linting rules. However, please at least try to make your code readable.
-  **Communication:** All technical decisions should be documented in GitHub Issues or Discord dev channels.

FAMILIARIZING WITH CODEBASE

LOCAL SETUP

Clone the repository and run `npm install` or `./gradlew build`. Ensure your `application.properties` file is configured with the provided development database keys.

ARCHITECTURE OVERVIEW

Frontend (Vite + React + TypeScript)

↓

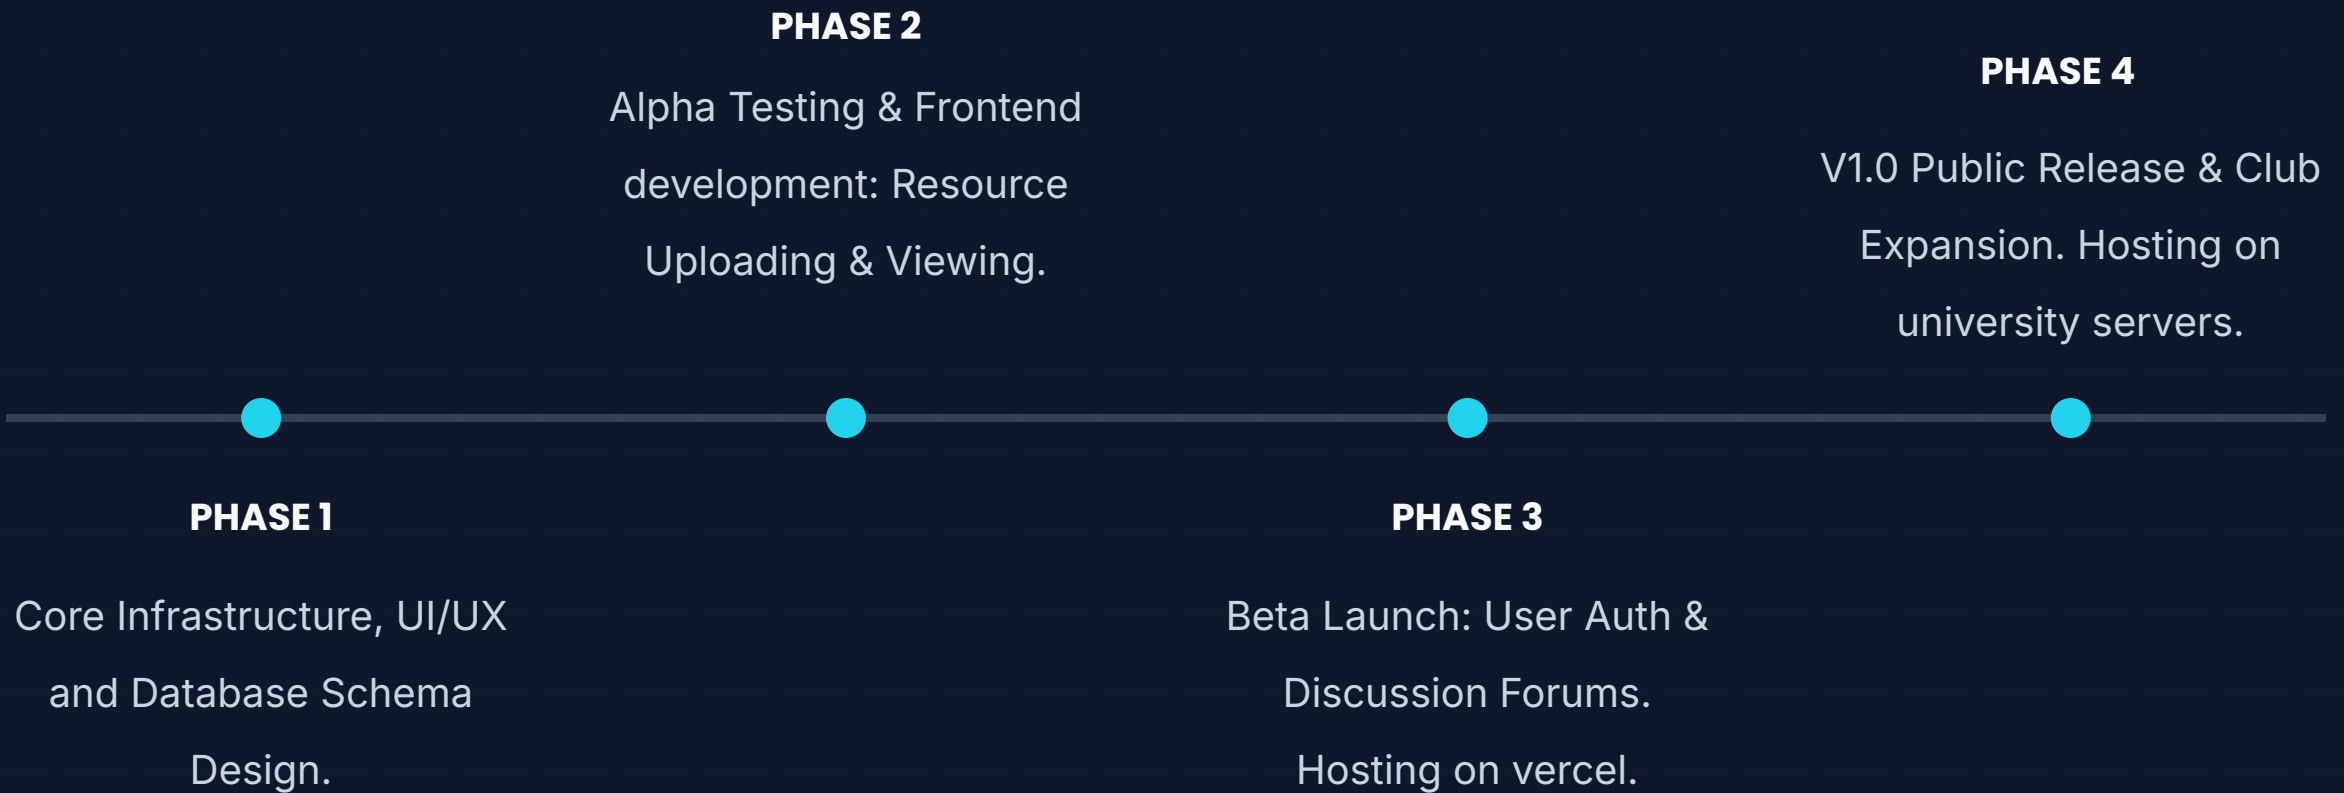

Backend API (Gradle + Spring Boot + Java/Kotlin)

↓

PostgreSQL Database

THE PROJECT ROADMAP

ASSIGNING FIRST ISSUES

Issue ID	Task Description	Priority	Owner
#101	Initial Landing Page Hero Section & Other Information Pages.	Critical	Frontend Team & UI/UX
#102	PostgreSQL Schema for Resource Metadata & API Development	High	Backend Team
#103	CI/CD Pipeline Setup (GitHub Actions)	Medium	DevOps Team
#104	Resource Search & Filtering Logic	Medium	All Hands

| THE EXPECTED IMPACT

1.1k

Potential Student Users

SCALING ACADEMIC COLLABORATION

We are building more than just a website. By centralizing resources, we aim to reduce the academic barrier for freshman and sophomore students across the CMPS faculty.

By creating this website we could potentially open the door to more club sponsors.

CULTURE & GROWTH

"We learn by building, and we build by helping one another."
